PROFESSIONAL SUMMARY

Detail oriented Data & Software Engineer with proven track record of over 2 years in the industry. currently serving as an IT System Engineer for L3 Master Data Solution Developer at Infineon Technologies. Proven success in managing enterprise data systems, database development and backend application engineering, with hands-on work in SQL, Python, C#, AI usage and Azure DevOps by supporting large-scale systems. Microsoft-certified in Azure Data Fundamentals and Power BI Data Analyst Associate, with practical experience in software development, AI, data analytics, and cloud-based data workflows. Committed to driving innovation and leveraging professional experience to improve system performance and reliability in fast-paced environments.

EDUCATIONAL BACKGROUND

UNIVERSITI KEBANGSAAN MALAYSIA (UKM)

(Sept 2021 – Jul 2025)

Bachelor of Computer Science (Hons) Data Science

CGPA: 3.70

Dean's List: 6 Semesters

First Class Honours

MALACCA MATRICULATION COLLEGE

(May 2020 – May 2021)

Physical Science (Module 2)

WORK EXPERIENCE

INFINEON TECHNOLOGIES

(Jul 2025 – 2026)

IT System Engineer – Master Data Developer

- Led incident resolution using Remedy for low- to critical-priority issues and executed Change Requests (CRs) through Octane to provide system repairs and enhancements.
- Expertise in Enterprise Database Management and consistent maintenance Infineon's enterprise engineering database systems ensure data integrity, availability, and consistent data flow across system classes and worldwide environments.
- Managed Oracle database using PL/SQL for patching, cleaning, restructuring, updates and data manipulation, developed functions, procedures and packages to automate backend tasks.
- Developed and refined ETL and data warehousing processes, including validation and error management, significantly improve data reliability and system performance.
- Enhanced system features using C# .NET by contributing to system improvements using MVC for feature releases and performance optimization.
- Led release management and CI/CD operations as Software Release Manager (SRM), ensuring stable deployments across DEV, INT and PROD environments through weekly Jenkins releases.
- Established SAP-related projects involving data migration, restructuring, duplicate management, data cleansing and reporting for enterprise data consistency, streamlining workflow by **30%**.
- Successfully utilized Jira for issue tracking, WinSCP for secure file transfers and TFS/Azure DevOps with Visual Studio for version control, script management and collaborative development.
- Developed KNIME workflows to automate comparable problem tickets, such as data patching, manipulation and clean data preparation in Excel, saving **50%** time.
- Successfully collaborated and troubleshooted with users, engineers and cross-functional teams to resolve database, backend, and UI issues and maintain smooth system operations.
- Generated technical documentation, UML diagrams and workflow visualizations using open-source tool to explain database scripts, ETL processes, and system architecture.
- Utilized Claude, Codex, Gemini and others AI Agent to accelerate development, improve debugging and enhance productivity over **50%**.

FREELANCE WEB DEVELOPER

(Sept 2025 – May 2026)

Web Developer (Freelance)

- Successfully designed responsive, high-performance websites for clients using Next.js and TypeScript, prioritizing scalability, SEO and modern UI/UX practice using Figma.
- Expertise in frontend and full-stack development, including Next.js, server-side rendering (SSR) and static site generation (SSG) for optimized performance.
- Managed successful Vercel and Cloudflare applications, including hosting, domain configuration, DNS records, SSL and CDN, for safe and fast global delivery.
- Utilized GitHub for source code management, version control and collaborative development workflows, including branching strategies and pull requests.
- Implemented SEO best practices, metadata structuring and performance tuning (e.g. Lighthouse enhancements, lazy loading, image optimization) to increase search visibility and user experience within **1** successful year.

- Configured domain routing, DNS records, and hosting environments for consistent website accessibility and uptime.
- Utilized VS Code and recent development tools to streamline coding, debugging, and project management for various client projects.
- Develop a rule-based chatbot in client’s website to enhance the productivity and minimize repetition questions asked by customer by **30%**.
- package my code and all its dependencies into a single using Docker, isolated container to ensure the application runs consistently across any computing environment.
- Engage with clients to gather requirements, propose solutions, and deliver projects aligned with business goals and timelines.

AIRASIA (K-YOUTH EMPLOYMENT PROGRAMME)

(Apr 2025 – June 2025)

Data Scientist Team (Apprenticeship)

- Received professional training in multiculturalism, communication, presentation skills and team collaboration.
- Collaborated with team to develop XGBoost machine learning models for predicting food waste, including data cleaning, feature engineering, and hyperparameter tuning with the accuracy over **80%**.
- Gained hands-on experience on Google Cloud Platform (GCP) for data tracking, validation and workflow monitoring.

TM RESEARCH & DEVELOPMENT

(Sept 2024 – Jan 2025)

Data Science Intern (Internship)

- Improved data quality by **90%** by processing and cleaning up thousands of records from complex network datasets such as access networks, termination logs, CTT and speed tests, enabling accurate fault monitoring and QoS analysis.
- Developed Random Forest Regression and LSTM models utilizing time-series data to anticipate internet speed changes and network failures with **80%+** accuracy.
- Built analytical dashboards using Power BI and Python (Matplotlib, Seaborn) to present weekly insights on network performance and support data-driven optimization decisions.
- Successfully supported OracleDB to MariaDB conversion, ensuring reliable data integration through rigorous testing and ETL development.
- Automated data extraction and transformation workflows using Selenium Robot Framework, reducing manual tasks by **60%** and improving reporting efficiency.
- Led Angular frontend development and REST API integration for TM R&D internal platforms, including data visualization, network analytics and monitoring dashboards.
- Contributed in developing Spring Boot backend services within a microservices architecture, supporting service integration and data task.
- Implemented Jira and GitLab to contribute to **8+** sprint cycles of Agile development, including version control, issue tracking, and cross-team collaboration with the project team.

PROFESSIONAL CERTIFICATION AND TRAINING ATTENDED

- **HackerRank Certified: Software Engineer Intern (2024)**
- **HackerRank Certified: Frontend developer (React) (2024)**
- **HackerRank Certified: SQL (Intermediate) (2024)**
- **Microsoft Certified: Azure Data Fundamentals (2025)**
- **Microsoft Certified: Power BI Data Analyst Associate (2025)**
- **Khazanah K-Youth Employment Programme (2025)**
- **Asia Pacific University of Technology and Innovation certified: Analyzing Data with Power BI (2025)**

INVOLVEMENTS

- Program Leader, SCHOOL@UKM Workshop Prototyping using Figma and Bravo **(2024)**
- Gold Award, Contingent March-Past, Sukan Antara Fakulti (SAF), Universiti Kebangsaan Malaysia **(2023)**
- Bronze Award, AR/VR Reality Competition, Mobile Application Development Club **(2022)**
- Silver Award, International Digital Innovation and Invention Challenge (IDIIC) **(2021)**

SKILLS

Programming Languages	: Python, Java, SQL, C#, PHP, R, HTML, CSS, JavaScript, TypeScript, VB
Web Development	: React, Angular, Next JS, Django, Flask, API, Git, Spring Boot, Node.js
Data Science & AI Tools	: Scikit-Learn, Ultralytics, TensorFlow, PyTorch, OpenCV, Pandas, NumPy, Seaborn, Matplotlib, Anaconda, Labelling
Big Data & Cloud	: Hadoop, Hive, Microsoft Azure, Microsoft Fabric, Azure DevOps Server, Azure, Data Factory, Azure Databrick
Data Analytics	: Microsoft Power BI, Tableau, Google Sheets, Microsoft Excel, Pivot, Looker
Databases	: MariaDB, OracleDB, Microsoft Access, PhpMyAdmin, SAP, MS SQL, MySQL, Postgre SQL, PL/SQL
Tools & Software	: GitLab, Github, Linux, VMware, Ubuntu, Visual Studio Code, Visual Studio, WinSCP, Confluence, Remedy, Jira, SharePoint, GitHub Copilot, Jenkins, WinSCP, Selenium, KNIME, Figma, Docker

LANGUAGES

Malay	: Native Proficiency
English	: Full Professional Proficiency
Indonesia	: Full Professional Proficiency
